# Prashyam Sankar Mitra

Software Developer | Full Stack Developer | AI Systems Builder

Kolkata, India | prashyamsmitra@gmail.com | +91 6290109624

linkedin.com/in/prashyam-s-mitra-2b55ba2b5 | github.com/prashyamsmitra-cell

## Profile

Computer Science undergraduate and Software Developer Intern experienced in building AI-powered full-stack applications, scalable backend systems, and cloud-native deployments. Skilled in React, Node.js, FastAPI, PostgreSQL, and LLM integrations with hands-on experience developing healthcare, recruitment automation, and enterprise workflow platforms. Strong problem-solving, collaboration, and software engineering fundamentals with a focus on production-ready systems.

## Education

**Techno India University** 2023 – 2027

B.Tech in Computer Science Engineering Kolkata, India

**Relevant Focus:** Data Structures, Web Development, AI Systems, Databases, Software Engineering, System Design

## Professional Experience

**Exide Industries** Mar 2026 – Present

Software Developer Intern Kolkata, India

- Tested and validated agentic AI systems using structured workflows to identify bugs, improve reliability, and optimize enterprise automation processes.
- Built backend systems using Node.js, Express.js, and PostgreSQL supporting persistent session tracking, analytics, and workflow continuity.
- Implemented cookie-based user session systems with long-term persistence for enterprise operational monitoring.
- Developed QR-enabled Visitor Management infrastructure reducing manual workflow dependency through automated tracking systems.
- Integrated email automation services, structured logging architectures, and deployment-ready backend workflows for scalable enterprise software systems.
- Collaborated with internal teams to deliver modular backend/frontend systems aligned with enterprise software requirements and operational workflows.
- Worked in a fast-paced development environment involving debugging, testing, communication, and cross-functional problem-solving.

## Key Projects

**CareSync – AI-Integrated Healthcare Management Platform (Live)** 2026

Full Stack Architect & Developer

- Built a full-stack healthcare platform using React, Node.js, PostgreSQL (Supabase), and FastAPI.
- Designed scalable modular architecture separating core APIs from AI services for maintainability and future expansion.
- Integrated Gemini API, Supabase Auth, JWT, and Twilio OTP systems for secure healthcare automation workflows.
- Built RESTful APIs with advanced middleware security, file management systems, and cloud deployment pipelines.
- Streamlined healthcare workflow management through AI-assisted automation and secure authentication systems.
- Deployed production-ready architecture using Vercel, Railway, and Render cloud platforms.
- **Live Project:** care-sync-taupe.vercel.app

**CVAnalyzer (AI-ATS) – Automated Recruitment Intelligence System** 2026

AI Systems Developer

- Developed an AI-driven Applicant Tracking System (ATS) automating resume screening and candidate-job compatibility analysis.
- Architected scalable backend systems using Python and FastAPI for concurrent CV processing and webhook integrations.
- Integrated Meta WhatsApp Business API to automate recruiter workflows through WhatsApp-based resume intake and candidate scoring.
- Leveraged Google Gemini Pro with LangChain to parse resumes, extract candidate intelligence, and generate ATS compatibility scores.

- Improved recruitment workflow efficiency through automated resume parsing and AI-powered candidate analysis pipelines.
- Engineered privacy-first PDF pipelines using in-memory document processing to secure sensitive candidate data.
- Managed deployment on Render with production environment variables, CI/CD pipelines, and scalable cloud infrastructure.

## Technical Skills

**Programming Languages:** Python, JavaScript, C, C++, SQL

**Frontend Development:** React.js, Vite, Tailwind CSS, HTML5, CSS3

**Backend Development:** Node.js, Express.js, FastAPI, REST API Design, Webhooks, JWT Authentication, Middleware Architecture

**Databases & Storage:** PostgreSQL, Supabase, SQL Schema Design, Cloud Storage

**AI/ML & Automation:** Google Gemini Pro, LangChain, Prompt Engineering, Rule-Based AI Systems, LLM Workflow Integration

**Messaging & Integrations:** Meta WhatsApp Business API, Twilio API, Email Automation Systems

**Deployment & DevOps:** Render, Railway, Vercel, Git, GitHub, CI/CD Pipelines

**Security & Architecture:** Authentication, Authorization, OTP Systems, Secure File Handling, Session Persistence, Scalable System Design

**Development Practices:** Agile Development, Scrum, Version Control, Debugging, Testing, Collaboration

**Core Concepts:** Data Structures & Algorithms, Software Engineering, Cloud Deployment, API Architecture, Problem-Solving

## Certifications

- Responsive Web Design – freeCodeCamp
- JavaScript Algorithms and Data Structures – freeCodeCamp
- Prompt Engineering for Developers – DeepLearning.AI

## Key Achievements

- Built and deployed live AI-integrated systems across healthcare, recruitment, and enterprise automation domains.
- Developed WhatsApp-integrated ATS automation using LLMs and production-grade webhook architecture.
- Built modular cloud-native platforms using FastAPI, Node.js, and distributed deployment systems.
- Applied practical software engineering principles to real-world business workflow digitization and automation.
